Document 1: JP, 2002-112198, A (Victor Company of Japan, Ltd.), 12 April, 2002 (12.04.02), full text, all drawings

is a document showing the general state of the art in this technical field, and describes a technique in which both the original recorded picture signals and after-recording speech signals are reproduced through a buffer memory by means of time sharing, and decoded and delivered. However, none of the documents cited in the ISR describes or suggests the technique in which pickup action is controlled to ensure that continuous M data blocks are reproduced whenever an access is made to either a main sequence or an additional sequence.
